

When Minorities Become Majorities: The Tyranny of Minorities

Writer John Kaminski said, "If we keep importing minorities, we will irreversibly step down the stairway to our own destruction."

By 2042, at current legal and illegal immigration rates, Mexicans, Latinos and Hispanics will become the new majority in America. They bring their cultures that have failed them in Mexico and Central America. They bring their language that fails them as to progress, education and functioning governments. They bring their religions, which mandate endless babies. Which, in turn, causes illiteracy from too many children and no way to educate them.

"When minorities rule, nations strangle and die," said Kaminski. "We see it happening today, all over the world. Worse than that, and something to worry about: when minorities become majorities, they generally kill off the previous owners."

He continued, "To flood target nations with helpless imbeciles is the reverse of what usually happens. Typically, an invading power such as the East India Company was able to demand subservience because of its superior military might no matter how small its contingent of invaders. And it's how Jewish strategists can rule countries today despite being a minuscule percentage of the population, because they control all nations' money supply."

Notice in America how we are controlled by the Military Industrial Complex. Notice how multi-national corporations call all the shots. Notice how huge percentages of minorities enjoy all the welfare, but refuse to participate in education

and personal accountability. A whopping 7 out of 10 Black children arrive without fathers and live with a single mother on welfare. How many and how much longer can Americans pay for that birthing phenomenon?

“Either technique inevitably destroys the host country,” said Kaminski. “The one we’re getting today is a deliberately planned Third World invasion which will produce an upsurge of random violence (a la South Africa) necessitating a police state crackdown in order to “restore order” (read: cancel all civil liberties) and “guarantee the safety of law-abiding citizens” (those who keep their mouths shut).

“The accelerated invasion of Third Worlders into the white countries of the Northern Hemisphere is obviously a strategy by the moneyed intelligentsia to keep the American public as feeble minded as possible in order to maximize profits from their various exploitation potential.”

One look at Minneapolis, Lewiston, Maine, Miami, LA and Detroit should scare the daylights out of every American. They are NO LONGER American cities. We’ve got 45 million foreign born in our country and tens of millions of them subsist on welfare. That’s your money.

Kaminski said, Simple math: take a 68 IQ Somali and mix him in with your average 93 IQ American and you get a country full of low-ball retards, sucking at the public trough and contributing nothing to the economy, just the way the Jews want it, a tried and true recipe for social disintegration. (Source for IQ’s per country: www.brainstate.org)

“This is the situation in the world today. That’s why all our politicians are plastic and either totally in hock to the Jews or not in office. I think that’s why Tulsi Gabbard was eliminated by the Democrats from their prospective presidential candidates.”

“This is our future, casting a giant black shadow as great as our final black shadow that haunts us all, yes, that one that is repressed, which by doing makes every answer we ever invented totally false,” said Kaminski. “We now have white homosexuals and black Communists telling the rest of us “normal” folk how to run the country. Of minorities telling the majority what to do. It was a major mistake that we did not oppose this with every resource at our command, because now we have the tail clearly wagging the dog and our country going down the drain.

Notice that most of Africa suffers from AIDS, Ebola, massive childbirth rates, and everyone’s starving. It seems to be a popular meme among blacks these days that they are “owed” reparations for the indignities their ancestors endured in the past. Yet in all these “Democratic” schemes there is never a mention of how it was whites who saved so many Africans from themselves from a continent that has proven itself unable to develop civilized societies, or in some cases, unable to refrain from eating each other for dinner.

“Does anybody remember why this country was founded – freedom from the unfeeling acts of a foreign government controlling our lives,” said Kaminski. “Yes, I know, that is what the Indians told our forefathers, and what the Palestinians tell us today about the homicidal, U.S. backed, Israelis. Since we are saying this today, does that mean the fate of all Americans is destined to mirror that of the American Indians and Palestinians? Only you get to decide.”

Dear Fellow American: our Congress remains on schedule to import another 110 million minorities from over 100 third world countries. If they succeed within the next 30 years, do you think our country, and/or your children stand a chance at survival?

John Kaminski is a writer who lives on the Gulf Coast of Florida, constantly trying to figure out why we are destroying

ourselves, and pinpointing a corrupt belief system as the engine of our demise.

Negative Impacts On Earth From Advanced Technology

Within the last 120 years, humans jumped from horse and buggies to rockets to Mars. Technology today drives everything we do, say, think and feel.

At first, technology engineered the automobile to give us speed to travel, then the phone to give communication over distances, and for the free spirits, airplanes gave us flight. Soon after, rockets to the moon, Mars and beyond.

In the last month, Sarah, a high school girl from Idaho asked me to write about the negative aspects of advanced technology. As I researched this column, it became dreadfully apparent that we do not control technology; it controls us. And, it's destroying the planet on which we live.

In the past, 70 years since WWII, technology has caused more harm, more danger, more death, more destruction and more contamination of this planet than ever in the history of the human race. Additionally, it's quickly driving us crazy emotionally, spiritually and socially.

Let start off with the obvious negatives of technology:

Since 1965, plastics overtook everything, and today, they

pollute every piece of land, waterway and all the oceans around the world. Plastics float and sink in our oceans to the tune of 5.5 trillion pieces. Humans add 2.5 million 24/7. That technology kills millions of marine life and avian life around the planet 24/7. Worse, humans refuse to stop or do anything to change it or improve it. Plastics will prove the worse invention for the Natural World ever invented by humans.

Since 1950, humans created and continue to create more than 70,000 chemicals that they inject into the air, land and water 24/7. Point blank: we poison the nest that feeds us. We poison the foods that nourish us. We poison everything on this planet. Results range from bee colony collapse worldwide to massive cancers in humans around the globe. We've got Big Pharma companies spreading opioids that kill hundreds of thousands and addict millions, but they continue to produce and distribute their poisons.

Since 1904, the automobile took over the planet as to carbon exhaust on the ground, in the air and underwater. That technology slowly but surely strangles the planet's ability to keep the oceans in PH balance, viable temperatures and workable living conditions for all marine life. In other words, human technology puts all living creatures on this planet at risk. Ultimately, it puts all humans at risk.

It is a fact that: whatever happens to plant and animal life on this planet, ultimately it will circle back on humanity. At this point, technology that allows humans to multiply at terrific speeds as we grow from 7.6 billion to 10.1 billion by 2050. We cause the extinction of over 100 species every single day of the year, i.e., 24/7. The famous Harvard biology Edward O. Wilson said, "Humanity at the current extinction rates very well could kill off 1/3 of all animal life by 2050." It's called the "Sixth Extinction Session." Because technology allows us to travel fast, spread our poisons and cut away rain forests at over an acre per second globally 24/7, the animals cannot adapt fast enough. (Source:

Animal Extinction rates by Dr. Norma Myers, Oxford University, UK, 40-year study)

Another nasty piece of technology: the microwave. It alters the foods that humans heat and then eat. For the cruelty of some very sick humans, they use it to cook live animals, just for fun. While you might enjoy a hot meal in seconds, that food you eat destroys the bacterium in your stomach that keeps your body healthy. More and more Americans suffer from gut issues because of the processed foods they eat and the microwaved foods they digest.

Another piece of technology: genetically modified organisms. Monsanto and Bayer now poison the crops we eat with glyphosates, but also genetically modify plants and fish into different kinds of DNA not compatible with anything on this planet. Monsanto infects the Natural World with GMO apples, soy, corn, fruits of all kinds, fish and vegetables. Those companies directly poison and destroy the pollinator bees that make all life on this planet possible. The CEO's of those big corporations should be arrested, prosecuted and jailed for crimes against humanity and the Natural World. (this author's opinion)

Negative Effects of Technology on Today's Youth

Kid Sloxs said, "Today's world is crammed with technology. Almost every family owns a computer, laptop, smartphone, tablet, television etc. All these make our lives easier. Originally created to serve faithfully to humanity, digital devices have also revealed their harmful impact on our lives. Many studies have concluded that our physical, social, and mental health suffers because of the excessive exposure to technology. Let's discover the negative effects of technology on different aspects of our lives."

The Smart Phone allows instant communication around the world, but it isolate and insulates countless millions of cell phone

addicts that curl into its mesmerizing power to cut them off from social interaction. NPR reported that teenagers in America text 3,300 times a month. That's over 110 messages a day! How on Earth can such addicted individuals learn social skills, study, eat, play and carry on normal life processes? Answer: they don't! They suffer from cell phone addiction.

Additionally, cell phone texting while driving causes over 4,000 deaths annually, second only to alcohol related driving deaths.

Smart phones cause total disruption in a classroom, so much so, kids fail to learn the basics of their educational foundational building blocks.

Not to be outdone, cell phones cause millions of kids to live sedate lives slouched over in an easy chair which causes them to become obese. It creeps up on them, and suddenly, they're fat. That situation causes enormous health risks for a lifetime and destroys-costs our health care system.

Cell phones cause mental and emotional consequences surfacing across the modern world. Those phones 'rewire' kids' brains into unhealthy and oftentimes anti-social behaviors just now surfacing around America and the world.

Cell phones have given rise to 43,000 child-teen pornography sites in the USA as of 2019. That's correct. Our children face tremendously graphic and sickening sexually explicit websites that destroy any kind of emotional-sexual balance in their youthful lives. I have no clue as to where that aspect of technology will end up.

So, as you can see, technology may have given us a washer-dryer, kitchen stove and air conditioning—but today, it's giving us more consequences than anything ever popped out of Pandora's Box.

Part 2: Other consequences of technology as to this planet,

the future and human beings.
